The designations employed and the presentation of material on this website do not imply the expression of any opinion whatsoever on the part of UNEP concerning the legal status of any country, territory or city or its authorities, or concerning the delimitation of its frontiers and boundaries. Mention of a commercial company or product in this publication does not imply the endorsement of UNEP.

Module Outline

1.	Introduction to the Module	2
2.	Finding Information	3-4
2.1.	Using the search pages	4-8
2.1.1.	Using multiple selection	8-9
2.1.2.	Managing Search Results	9-12
2.2.	National Contacts	12-17
2.3.	Laws and Regulations	17-20
2.4.	Country's Decisions and other Communications	20-26
2.5.	LMOs, Genes and Organisms	26-28
2.5.1.	LMO - Unique Identifiers Registry	28-31
2.5.2.	Gene Registry	31-32
2.5.3.	Parent or Donor Organism Registry	32-33
2.5.4.	Example on searching the registries	33-35
2.6.	Roster of Experts	35-37
2.7.	Capacity-Building	37-42
2.8.	Biosafety Information Resource Centre (BIRC)	42-44
2.9.	Scientific Bibliographic Database	44-47
2.10.	Organizations	47-52
3.	Compiled Information	53
3.1.	National Contacts Compiled List	53-54
3.2.	LMO Registry Compiled List	54
3.3.	Organism Registry Compiled List	54-55
3.4.	Gene Registry Compiled List	55
4.	Search using Record ID	56-58

1 Introduction to the Module

What the user will learn in this module:

This module will introduce the user to the components of the BCH Central Portal and provide guidance on how to search for information in the BCH databases.

Context

The UNEP-GEF Project for Capacity Building for Effective Participation in the Biosafety Clearing-House (BCH), in collaboration with the Secretariat of the Convention on Biological Diversity (SCBD), prepared a modular training package aimed at providing a practical “how-to” guide for countries to assist them in learning, understanding, using, and setting up national access to the BCH. The training package was designed to be flexible and is tailored to meet the diverse needs of different countries, allowing them to select those tools that are most useful to their situation, needs and priorities. The training package is divided into several modules, each addressing one element of the BCH. This module has been developed by the Secretariat after the revamping of the Management Centre, in line with all the other previous modules.

Audience

This module is designed to provide guidance to users of the BCH. It is developed for a non-technical audience with little or no knowledge of the Protocol and the BCH, but with a need to access and use data. Access to information is available to all users, but access to input facilities for the BCH is limited to those who have particular levels of access, e.g. National Focal Points (NFPs) and data entry personnel.

Purpose

This module provides detailed information about the databases found within the **Finding Information** section of the Central Portal. It explains how to find information in the BCH Central Portal. The web-based Central Portal allows governments to administer their information directly in the BCH databases. These databases, which form the nucleus of the BCH, can be searched to find relevant and useful information about the Protocol.

Each of the sections will guide the user into the different procedures to retrieve the maximum relevant information available through the BCH Central Portal.

© UNEP 2004-2010 all rights reserved

2 Finding Information

URL: <http://bch.cbd.int/database/>

Under Article 20, the BCH was established to facilitate the exchange of information about LMOs. The requirements for the types of information are listed in this Article and the BCH maintains databases with the relevant information. Access to this information is provided through the **Finding Information** page of the BCH website, which can be found through a link on the navigation bar of the BCH.

Figure 1

The screenshot shows the 'Finding Information' section of the BCH website. The left sidebar lists categories like National Contacts, Laws and Regulations, Country's Decisions and other Communications, LMOs, Genes or Organisms, Roster of Experts, Capacity-Building, Biosafety Information Resource Centre (BIRC), Scientific Bibliographic Database, and Organizations. The 'National Records' link under 'National Contacts' is circled in red. The right sidebar lists categories like LMOs, Genes or Organisms, Capacity-Building, and Biosafety Information Resource Centre (BIRC). The 'Reference Records' link under 'LMOs, Genes or Organisms' is circled in red.

Figure 2

This section allows users to access a wide variety of scientific, technical, environmental, legal and capacity building information from the BCH databases. The categories of information are listed on the **Finding Information** page.

The main page of the **Finding Information** section contains a welcome message and a list of the information available which is divided into two groups. The left-hand group lists categories of National Records, which are submitted by Governments as mandated by Article 20 of the Protocol. The right-hand group lists categories of Reference Records, which are submitted by general BCH registered users. Both groups of information also appear in the Finding Information section of the left-hand menu. The **Compiled Information (Section 3)** section of the left-hand menu provides access to compiled records and listings.

The following chapters provide a general guide to the usage of the search pages, followed by an insight specifically into each of the categories of information and on how to access information from each database.

2.1 Using the search pages

The **Finding Information** section of the BCH provides web pages to search for each category of information in the BCH. To access a searchable database of interest, click on the link either on the Main page or in the left-hand menu. These web pages are designed to let the user specify the search criteria and then display the records found which match the search criteria used.

All search pages have a similar and consistent design. Let us take the **Search for National Contacts** page as an example.

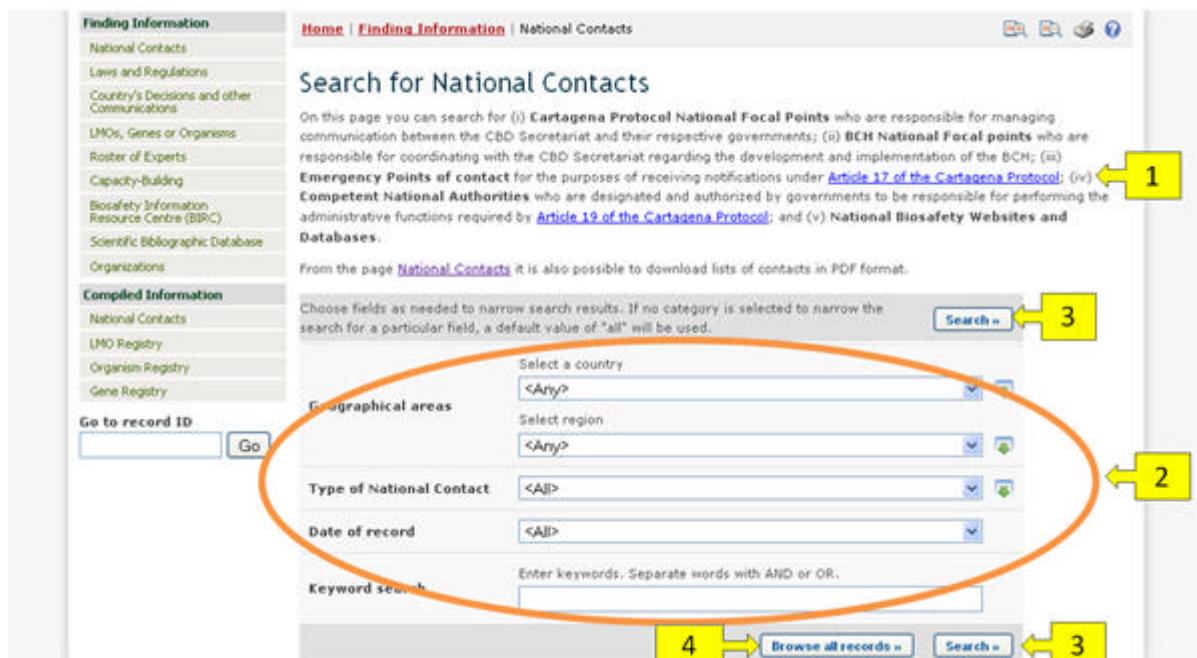

Figure 3

The search page contains:

1. A brief description of the search page and the type of information that can be found through it.
2. The search criteria input area.
3. The **Search** buttons.
4. The **Browse all records** button.

The criteria that can be used are given by the input boxes that appear on the search page of each category of information. The input boxes are used to narrow the search results, i.e. they can be used to obtain a smaller and more specific set of records, but never a wider one.

Several types of input boxes (also called fields) can be found in the criteria input area. Many of these types of fields are also found in the search pages of other categories of information. The following list describes these field types, which are shared among several categories of information:

- **Selection list field:** Fields of this type contain a list of pre-defined terms. This means that the user cannot input any term in the field, but must select terms from that pre-defined list. The list of terms is populated from a controlled vocabulary (see <http://bch.cbd.int/help/faq/#THE>). The most common example of this type of field is the **Country** field, which allows the user to narrow the search results to records regarding a specific country. Another example of this type of field is the **Region** field, which allows narrowing the search results to a specific region in the world. Please note that the **Country** and the **Region** fields cannot be used together: only one of them can be used at a time. The default setting for each selection list field is the first item at the top of the menu list. It is also possible to select more than one term from the list, and this is covered in “Using multiple selection” (Section 2.1.1).

Finding information in the BCH Central Portal

Choose fields as needed to narrow search results. If no category is selected to narrow the search for a particular field, a default value of "all" will be used.

	<input type="button" value="Last two months"/> 
	<input type="button" value="Last six months"/> 
	<input type="button" value="Last year"/> 

Figure 5

- Keyword field:** Fields of this type allow narrowing the search results to records that have specific keywords. A single keyword may be entered, or a combination of keywords using the standard keyword syntax explained below. Please notice that a search that is made by using keywords only produces results of records containing exactly the searched text and not possible synonyms that have not been

inserted (i.e. a search with the single keyword “Maize” will produce a list of records containing the word “Maize” but not the words “Corn” or “Zea mays”)

- **AND:** if two keywords are combined using the AND operator (see picture) then only records containing both keywords will be returned
- **OR:** if two keywords are combined using the OR operator (see picture) then records which have at least one of the words will be returned.
- **Asterisk:** the user may enter part of a keyword followed by an asterisk (see picture) so that records with keywords which start with the text entered are returned. For example, if “Agricultur*” is entered, then all records with keywords beginning with “Agricultur”, such as “Agriculture” and “Agricultural”, will be returned.

Keyword search	Enter keywords. Separate words with AND or OR. <input type="text" value="Import"/>

	Browse all records » Search »
Keyword search	Enter keywords. Separate words with AND or OR. <input type="text" value="Agricultur*"/>
	Browse all records » Search »

Figure 6

- **Fields for adding additional search criteria:** Some categories of information contain fields that allow the user to add more search criteria to the search criteria area. For example, in the [Search for LMOs, Genes and Organisms](#) page there is a field called **Type of living organism** for adding additional search criteria to define how to search for living organisms. Selecting an option in that field will make a new field appear in the search criteria area. For example, if the user selects the “Filter by gene trait” option, then a new selection list field called **Introduced or modified traits** will appear. The user may then select a term from the pre-defined list of terms of that field so as to narrow the search results to a specific gene trait. However, the user could have selected the “Filter by gene name” option before in order to make a field called **Gene** appear and thus narrow the search results to records of a specific gene.

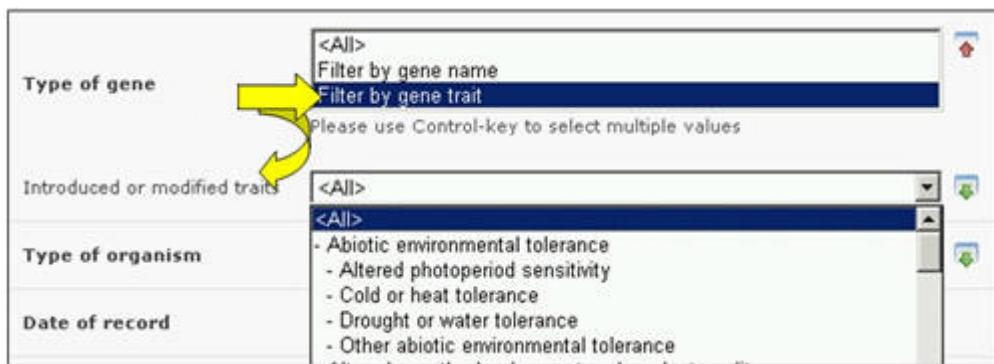

Figure 7

Fields of this type are similar in appearance to **Selection List** fields but absolutely different in their operation. One distinctive aspect of these fields is that all their options begin with “Filter by”. Note that several new search fields may be added by selecting more than one option from the additional criteria field; please see “**Using multiple selection**” (Section 2.1.1).

Finally, the **Search** button performs the search based on the specified criteria and then shows the search results, while the **Browse all records** button displays all records in the current category of information.

2.1.1 Using multiple selection

Many fields allow the user to select an option from a dropdown box, e.g. selection lists and additional criteria fields. These fields are often followed by a small icon with a green arrow, which can be used to select more than one option from the dropdown box.

The screenshot shows a search interface with various filters. A specific field under 'Geographical areas' is highlighted: 'Select a country' with a dropdown menu. An orange circle and a yellow arrow point to the green arrow icon next to the dropdown menu, indicating it's a multiple selection field. Below this, there are other fields like 'Select region', 'Type of National Contact', 'Date of record', and a 'Keyword search' input field. At the bottom are 'Browse all records' and 'Search' buttons.

Figure 8

Clicking on that icon displays the selectable options in a list. To select multiple options, hold down the Control (Ctrl) key if you are using a PC system or the Apple key if you are using a Macintosh system, while you click on the several options that you wish to select.

The icon now shows a red arrow pointing up, and clicking on it again will close the list, preserving your selected options.

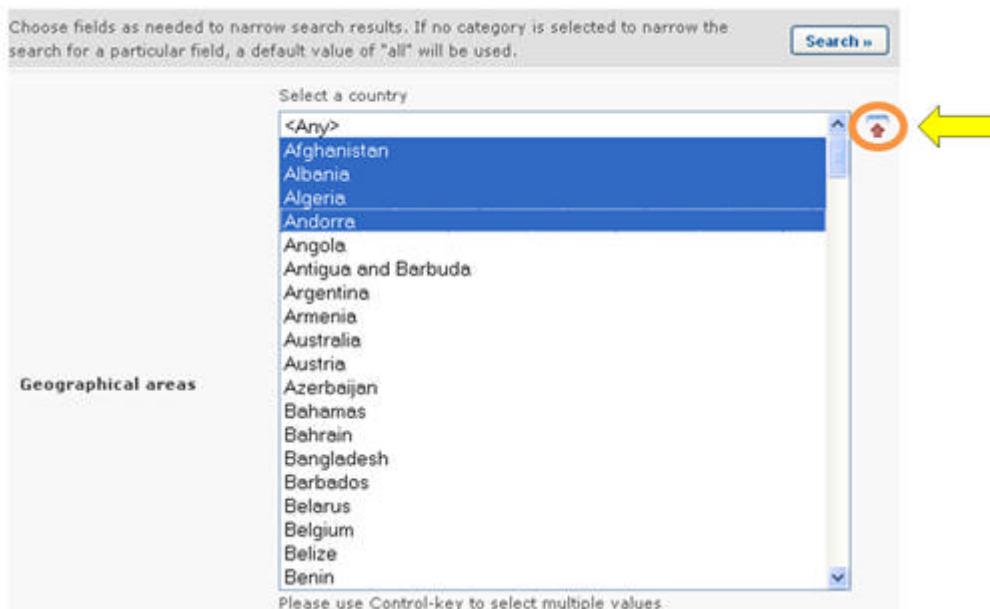

Figure 9

When more than one option is selected from a selection list field, records corresponding to any of the selected options are included in the results. For example, when searching for National Contacts, if two countries are selected in the Country field, National Contacts from both countries will be displayed in the search results, i.e., records corresponding to the first and to the second selected countries.

Conversely, when more than one option is selected from an additional search criteria field, several new fields will be displayed in the search criteria area for the user to fill. For example, when searching for Country's Decisions and Other Communications, new search criteria can be added by selecting multiple options in the **Type of Living Organism** field. For example, if the "Filter by Unique Identifier", "Filter by Gene name" and "Filter by technique used" options are selected, then three new fields will appear accordingly in the screen for the user to input search criteria in them.

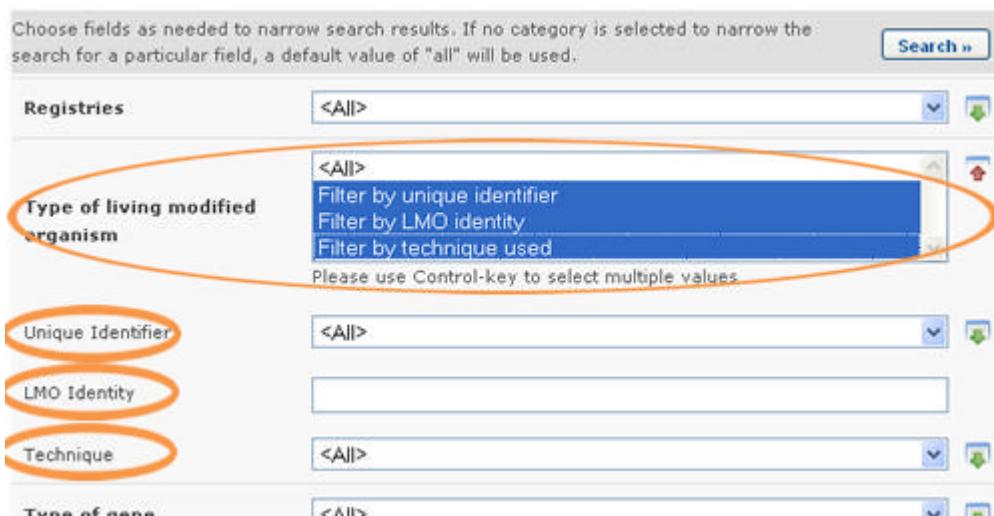

Figure 10

2.1.2 Managing Search Results

Pressing the **Search** button will display the search results page, listing all records that match the specified search criteria. The header of the list shows the amount of records found and provides links to navigate through the pages of the search results list.

Record 1 to 25 of 795

ID	Record holder and type
9896	Afghanistan National Focal Point Hashim Barikzai CBD National Focal Point
9312	Albania Competent National Authority Ministry of Environment, Forestry and Water Administration
9313	Albania Competent National Authority Ministry of Agriculture and Food
9314	Albania Competent National Authority Ministry of Health
9619	Albania National Focal Point Zamir Dedei Biosafety Clearing-House Focal Point
9652	Albania National Database or Website Development of a National Biosafety Framework for Albania Development of a National Biosafety Framework for Albania
9655	Albania National Database or Website Albanian Ministry of the Environment Albanian Ministry of the Environment website
57024	Albania National Focal Point Fatmir Mediu Cartagena Protocol on Biosafety National Focal Point, CBD National Focal Point, Emergency Measures (Article 17) Contact Point
8681	Algeria National Focal Point Nadia Chenouf Biosafety Clearing-House Focal Point, CBD National Focal Point

Figure 11

For some categories of information, additional features are provided for handling the search results, and these are covered in the section corresponding to each category of information.

Each record displayed contains a link (which can be on the record ID or on the record name, depending on the record type) which displays the detailed record information when clicked on.

The screenshot shows two windows side-by-side. The left window is titled 'Search results' and lists several records, with a yellow arrow pointing from the top of the list towards the right window. The right window is titled 'National Focal Point' and displays detailed information about a specific record, including its ID, status, creation date, last update date, and owner. It also shows sections for 'General information' and 'Category of National Focal Point'.

This picture was taken on February 2010 with the only purpose of providing an example on the usage of the BCH.

Figure 12

If the record is available in more than one language, then a bar is displayed which allows the user to select in which language to view the record information.

The screenshot shows a record page for a 'Biosafety Information Resource'. A yellow oval highlights a dropdown menu at the top of the page that says 'This document is also available in the following languages: English'. The left sidebar contains a navigation menu with various links like 'National Contacts', 'Laws and Regulations', etc. The main content area shows 'Record information and status' and 'General Information' sections.

Figure 13

If any record in the database references the one currently being displayed, then a section called **Records referencing this record** appears at the bottom of the page. This section provides direct links to all records that reference the current one.

Records referencing this document (87)	
ID	Description
213	Country's Decision or any other Communication MON-ØØØ1Ø-6 - YieldGard™ Maize Resistance to diseases and pests - Insects - Lepidoptera (butterflies and moths)

5434	Country's Decision or any other Communication MON-ØØØ3Ø-6 x MON-ØØØ1Ø-6 - Roundup Ready™ YieldGard™ Maize Resistance to diseases and pests - Insects - Lepidoptera (butterflies and moths) Resistance to herbicides - Glyphosate Country's Decision or any other Communication

Figure 14

2.2 National Contacts

URL: <http://bch.cbd.int/database/contacts/>

Article 19 of the Protocol requires the designation of Competent National Authorities and National Focal Points. This information, as well as National Biosafety Websites and Databases, is searchable from the [Search for National Contacts](#) page.

The search page for information about **National Contacts** can be accessed from the link in the **Finding Information** drop down menu on the navigation bar, or from the link in the left-hand menu of the **Finding Information** page, or from the **National Contacts** link in the text of that page.

Figure 15

The National Contacts search interface enables the user to search for:

1. National Focal Points for the Cartagena Protocol on Biosafety (CPB-NFPs), who are responsible for liaising between the CBD Secretariat and their respective governments;
2. National Focal Points for the Biosafety Clearing-House (BCH-NFPs), who are responsible for liaising with the CBD Secretariat regarding the development and implementation of the BCH;
3. Emergency Measures Contact Points for receiving notifications under Article 17 of the Protocol;
4. Competent National Authorities, who are designated and authorized by governments to be responsible for performing the administrative functions required by Article 19 of the Protocol; and
5. National Biosafety Websites and Databases.

Choose fields as needed to narrow search results. If no category is selected to narrow the search for a particular field, a default value of "all" will be used.

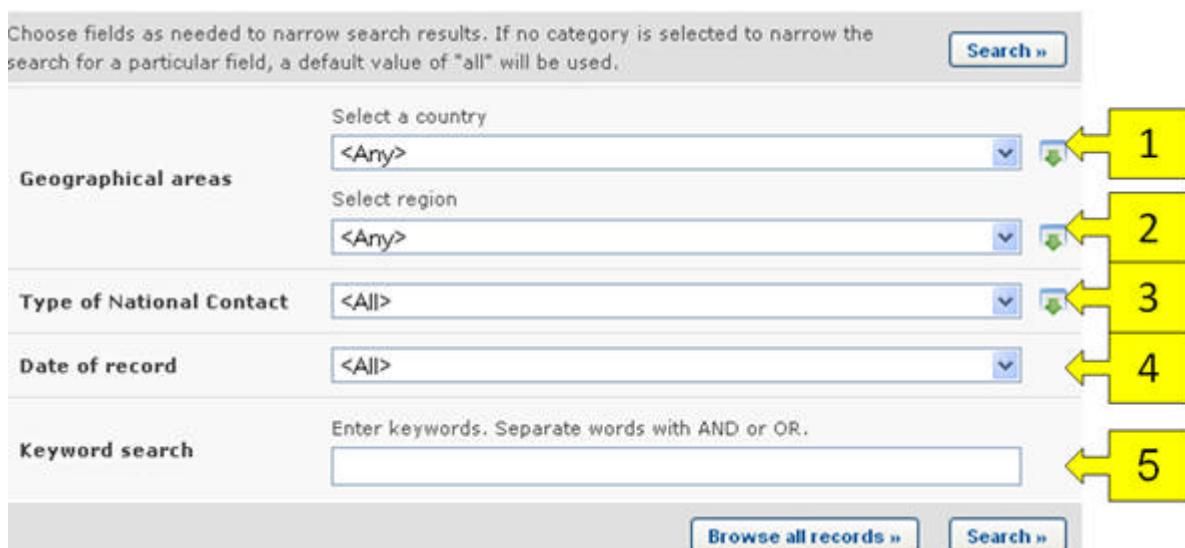

Figure 16 shows the 'Search for National Contacts' page. It features five search criteria boxes: 'Geographical areas' (Country and Region), 'Type of National Contact', 'Date of record', and 'Keyword search'. Each box has a small green arrow pointing to a yellow box containing a number (1 through 5) corresponding to the numbered list below. The 'Search' button at the bottom right is also highlighted with a yellow arrow.

Figure 16

On the **Search for National Contacts** page there are several search criteria boxes:

1. **Country:** Selection list field for selecting a country
2. **Region:** Selection list field for selecting a region
3. **Type of National Contact:** Selection list field for narrowing the search results to specific types of national contacts
4. **Date of record:** Date field for narrowing the search results to a time interval
5. **Keyword search:** Keyword field for narrowing the results by keyword

See “Using the search pages” (Section 2.1) to learn about types of fields and their operation.

Example 1: A user may wish to identify the emergency measures contact points in Paraguay for issues related to unintentional transboundary movements of LMOs or emergency measures. By selecting Paraguay from the **Country** field and ‘Emergency Measures (Article 17) Contact Point’ from the **Type of National Contact** drop down menu, the user narrows the search results to the records most likely to provide the required information.

Choose fields as needed to narrow search results. If no category is selected to narrow the search for a particular field, a default value of "all" will be used.

Geographical areas

2.3 Laws and Regulations

URL: <http://bch.cbd.int/database/laws/>

Under the Cartagena Protocol, Parties are responsible for making available through the BCH information about their relevant laws and regulations.

The search page for information about **Laws and Regulations** can be accessed from the link in the **Finding Information** drop down menu on the navigation bar, or from the link in the left-hand menu on the **Finding Information** page, or from the **Laws and Regulations** link in the text of that page.

Figure 21

This database enables users to search for:

1. National Laws;
2. National Regulations;
3. National Guidelines;
4. Bilateral Agreements;
5. Multilateral Agreements; and
6. Regional Agreements.

On the **Search for Laws and Regulations** page there are several search criteria boxes:

1. **Country:** Selection list field for selecting a country
2. **Region:** Selection list field for selecting a region
3. **Type of Laws or regulations:** Selection list field for narrowing the search results to specific types of laws and regulations
4. **Subject area:** Selection list field for narrowing the search results to specific subject areas
5. **Date of record:** Date field for narrowing the search results to a time interval
6. **Keyword search:** Keyword field for narrowing the results by keyword

See "Using the search pages" (Section 2.1) to learn about types of fields and their operation.

The screenshot shows the 'Search for Laws and Regulations' page. On the left, there's a sidebar with sections like 'Finding Information' (National Contacts, Laws and Regulations, etc.) and 'Compiled Information' (National Contacts, LMO Registry, etc.). Below that is a 'Go to record ID' input field and a 'Go' button. The main area has a heading 'Search for Laws and Regulations' and a paragraph of explanatory text. Below that is a note about narrowing search results and a 'Search' button. The search interface consists of several dropdown menus and input fields:

- Geographical areas:** 'Select a country' dropdown (labeled 1)
- Geographical areas:** 'Select region' dropdown (labeled 2)
- Type of Laws or regulations:** dropdown (labeled 3)
- Subject area:** dropdown (labeled 4)
- Date of record:** dropdown (labeled 5)
- Keyword search:** input field (labeled 6)

At the bottom are 'Browse all records' and 'Search' buttons.

Figure 22

Example: A user wishes to identify national laws and regulations in the Oceania region. Select Asia-Pacific-Oceania in the Region box. Select National laws, regulations & guidelines in the Type of Laws or regulations box. Click on the Search button. The search results are displayed and the user can select any record to study the documentation from specific countries in the region.

This screenshot shows the same search interface as Figure 22, but with different filter settings. The 'Region' dropdown in the 'Geographical areas' section is now set to 'Asia-Pacific - Oceania'. The 'Type of Laws or regulations' dropdown is set to 'National Laws, Regulations & Guidelines'. All other fields (Country, Subject area, Date of record, Keyword search) remain at their default values ('Any'). The 'Search' and 'Browse all records' buttons are at the bottom.

Figure 23

The screenshot shows the BCH Central Portal's search results page and a detailed document view. The search results page displays records 1 to 20 of 20, with a yellow arrow pointing from the 'Record holder and type' column to the 'Law, Regulation or Guideline' section of the detailed view. The detailed view for 'Environment Act 1999 - as amended' includes sections for Record information and status, General Information (Jurisdiction, Title of document), and Legislative details (Type of document).

ID	Record holder and type

General Information

Jurisdiction

- Council of Europe and other signatories

Title of document

Convention on the Conservation of the European Wildlife and Natural Habitats (Bern Convention)

Legislative details

Type of document

- Multilateral Agreement or Arrangement

This picture was taken on February 2010 with the only purpose of providing an example on the usage of the BCH.

Figure 24

2.4 Country's Decisions and other Communications

URL: <http://bch.cbd.int/database/decisions/>

Under the Cartagena Protocol, Parties are responsible for making available through the BCH information regarding their relevant decisions, declarations and other communications.

The search page for information about **Country's Decisions and other Communications** can be accessed from the **Finding Information** drop down menu on the navigation bar, or from the link in the left-hand menu of the **Finding Information** page, or from **Country's Decisions and other Communications** link in the text on that page.

The screenshot shows the 'Finding Information' section of the BCH Central Portal. On the left, there is a sidebar with various links such as 'National Contacts', 'LMOs, Genes or Organisms', 'Roster of Experts', 'Capacity-Building', 'Biosafety Information Resource Centre (BIRC)', 'Scientific Bibliographic Database', and 'Organizations'. Below these are sections for 'Compiled Information' and 'Go to record ID'. The main content area has two sections highlighted with orange circles:

- National Records**: Contains a link to 'Country's Decisions and other Communications'.
- Reference Records**: Contains a link to 'Country's Decisions and other Communications'.

Both of these circled sections lead to detailed pages about different types of decisions and communications related to LMOs.

Figure 25

This database enables users to search for decisions and other communications related to:

- Decisions on Contained use of LMOs (Article 6.2)
- Decisions on LMOs for direct use as food or feed, or for processing (Article 11, LMOs-FFPs)
 - Decisions on domestic use of an LMO, including its placing on the market
 - Decisions on import of LMOs
- Decisions on LMOs for intentional introduction into the environment (Article 7-10)
 - Decisions taken in accordance with the Advance Informed Agreement (AIA) procedure specified in Article 10
 - Decisions taken in accordance with your domestic regulatory framework
- Decisions on Pharmaceuticals (Article 5)
- Decisions on Transit of LMOs (Article 6.1)
- Decisions under the Simplified Procedure (Article 13)
- Other decisions, notifications, declarations or communications
 - Communication of information on 'Handling, Transport, Packaging and Identification' (Article 18)
 - Declarations made upon ratification of or accession to the Protocol
 - Declaration that, in the absence of a domestic regulatory framework, decisions on LMOs-FFPs will be taken according to Article 11.6
 - Notifications about illegal transboundary movements of LMOs (Article 25.3)

Finding information in the BCH Central Portal

- Notification about the unintentional transboundary movement of LMOs (Article 17.1)
 - Notifications that a Party does not have access to the Biosafety Clearing-House (Article 11.1)
 - Notifications that domestic regulations shall apply with respect to specific imports of LMOs (Article 14.4)
- Risk Assessments

On the **Search for Country's Decisions and Other Communications** page there are several search criteria boxes:

1. **Country:** Selection list field for selecting a country
2. **Region:** Selection list field for selecting a region
3. **Type of decision, declaration, notification or report:** Selection list field for narrowing the search results to specific types of decisions, declarations, notifications or reports
4. **Type of living modified organisms:** Additional search criteria field to add different search criteria.
5. **Date of record:** Date field for narrowing the search results to a time interval
6. **Keyword search:** Keyword field for narrowing the results by keyword

See “Using the search pages” (Section 2.1) to learn about types of fields and their operation.

The screenshot shows the 'Search for Country's Decisions and other Communications' page. On the left is a sidebar with 'Finding Information' and 'Compiled Information' sections. The main content area has a heading 'Search for Country's Decisions and other Communications'. It includes a brief description of the search scope, which covers decisions under the AIA, Article 11 of the Cartagena Protocol, and risk assessment reports. Below this is a section titled 'Choose fields as needed to narrow search results; If no category is selected to narrow the search for a particular field, a default value of "all" will be used.' Six search criteria fields are listed, each with a yellow number indicating its corresponding step in the list above:

- 1. Select a country (dropdown menu with '<Any>')
- 2. Select region (dropdown menu with '<Any>')
- 3. Type of decision, declaration, notification or report (dropdown menu with '<All>')
- 4. Type of living modified organisms (dropdown menu with '<All>')
- 5. Date of record (dropdown menu with '<All>')
- 6. Keyword search (text input field)

At the bottom right of the search form, there is a 'Search' button, which is highlighted with a yellow circle.

Figure 26

Search results are displayed in the **Search results for country's communications** page. Firstly, a set of icons is displayed to the right of each record. These icons indicate which categories of LMO use each record refers to. For example, some records may contain decisions regarding an LMO for use as feed, food and processing, while others may contain a decision about an LMO for introduction into the environment.

ID	Description	
771	Argentina ACS-ZM003-2 Liberty Link™ Maize	Zea mays Glufosinate
777	Argentina MON-00810-6 YieldGard™ Maize	Zea mays Lepidoptera (butterflies and moths)
789	Argentina SYN-BT011-1 YieldGard™ Maize	Zea mays Lepidoptera (butterflies and moths) Glufosinate

Figure 27

An icon in colors means that the record involves that category of LMO use, while a grey icon indicates that it does not. The meaning of each icon is described in the following table.

	Intentional introduction into the environment
	Direct use as food
	Direct use as feed
	Processing
	Contained use
	Pharmaceutical
	Transit

In addition to the features described in “Managing Search Results” (Section 2.1.2), this results page provides features for grouping and sorting the records in the result list. The grouping feature displays a grouped view of the results by selecting an option in the **Group records by** box. For example, by selecting “Country”, the result list is arranged into folders, so that all records from the same country appear inside a folder labeled with the country name. Clicking on the arrow to the right of the folder will open the folder and show its records.

The screenshot shows the 'Finding Information' section of the BCH Central Portal. At the top, there are tabs for 'Home', 'Finding Information', 'Registering Information', 'Resources', and 'Help'. A dropdown menu 'Country Profiles...' is open. Below the tabs, a search bar displays 'Search results' and various icons. The main content area is titled 'Search results for country's communications'. It includes a 'Group records by' dropdown set to 'Country' with a 'Sort records by' dropdown below it containing 'Country', 'LMO', 'Novel trait', 'Taxonomic Status', and 'Type of decision'. To the right, a 'Results per page' dropdown is set to 25, and a link 'Export results to CSV file' is available. The search results table has columns 'ID' and 'Description'. Two entries are shown: 'Bulgaria' (1 record) and 'Japan' (69 records). The 'Japan' row has two downward-pointing arrows indicating further sorting.

Figure 28

The **Sort records by** box allows sorting the records by the specified criteria. Multiple sort stages can be defined by using the additional **and then** fields that appear every time a sorting option is selected. For example, search results may be sorted by country by selecting the “Country” option in the **Sort records by** box; records from the same country can be further sorted by LMO by selecting “LMO” in the **and then** field that appears.

This screenshot shows a more detailed view of the search results. The 'Sort records by' dropdown is expanded to show 'Country' as the first stage and 'LMO' as the second stage. The search results table now displays 1193 records. The first few entries are:

ID	Description	
765	Argentina	
771	Argentina ACS-ZM003-2 Liberty Link™ Maize	Zea mays Glufosinate
11814	Argentina DAS-01507-1 Herculex™ I Maize	Zea mays Lepidoptera (butterflies and moths), Glufosinate
11815	Argentina MON-00021-9 Roundup Ready™ Maize	Zea mays Glyphosate
783	Argentina MON-00531-6 Bollgard™ Insect protected cotton	Gossypium hirsutum Lepidoptera (butterflies and moths), Kanamycin
7456	Argentina MON-00603-6 NK603 Roundup Ready™ Maize	Zea mays Glyphosate
43633	Argentina MON-00603-6 x MON-00810-6 Roundup Ready™ YieldGard™ Maize	Zea mays Lepidoptera (butterflies and moths), Glyphosate

Figure 29

Additionally, the results page contains a box in which the user can select how many records are to be shown in each page. There is also a link to download the search results in CSV (comma separated values) format, so that they can be used and inserted into other documents and handled by other applications.

Example: A user wishes to identify all the decisions taken by New Zealand under Article 11 of the Protocol. Select New Zealand in the **Select a country** box. Select Decision on LMOs for direct use as food or feed, or for processing (Article 11, LMOs - FFP) in the **Type of decision, declaration, notification or report** box. Click on the **Search** button.

The search results are displayed as a list of records. Detailed information about each record can be viewed by clicking on the record ID number (in bold blue type).

Choose fields as needed to narrow search results. If no category is selected to narrow the search for a particular field, a default value of "all" will be used.

Figure 30

The screenshot shows two windows of the BCH Central Portal. The top window is titled 'Search results for country's communications' and displays a list of 23 records found. A yellow arrow points from the 'Description' column of the first record (New Zealand, SYN-BT011-1, YieldGard™ Maize) to the second window. The second window is titled 'Country's Decision or any other Communication' for record ID 187, Zea mays. It shows record information and status, general information, and decision or communication details. The 'Competent National Authority(ies) responsible for the decision or communication' section lists 'Food Standard Australia New Zealand'.

ID	Description
187	New Zealand SYN-BT011-1 YieldGard™ Maize
192	New Zealand DD-026005-3 High oleic acid Soybean
203	New Zealand MON-01445-2 Roundup Ready™ Cotton

Figure 31

2.5 LMOs, Genes and Organisms

URL: <http://bch.cbd.int/database/organisms/>

The Secretariat maintains three registries in the BCH to assist users to access information regarding LMOs as follows:

1. LMO Registry;
2. Gene Registry;
3. Organism Registry.

Each registry contains records with information about LMOs, Genes and Organisms. They can be accessed from the search pages for information about LMOs, Genes or Organisms, which can be found in the **Finding Information** drop down menu on the navigation bar, in the link in the left hand menu of the **Finding Information** page, or in the **LMOs, Genes or Organisms** link in the text of that page.

These registries can be accessed from the search pages explained in this section or can also be used in the form of Compiled Information, which is covered in “Compiled Information” (Section 3).

Figure 32

On the **Search for LMOs, Genes or Organisms** page there are several search criteria boxes:

1. **Registries:** Selection list field for selecting the registries in which to search for information. This allows the user to select what types of information (LMOs, Genes or Organisms) are to be included in the search results.
2. **Type of living modified organism:** Additional search criteria field to add more criteria regarding LMOs to narrow the search results. Only records containing or referencing the specified LMO criteria will be returned. By selecting items in this list, the user can make the following new fields appear:
 1. **Unique Identifier:** Selection list field to specify the unique identifier of the LMO.
 2. **LMO Identity:** Keyword field to search for keywords in the identity part of the LMO records
 3. **Technique:** Selection list to narrow search results to records which match the selected techniques.
3. **Type of gene:** Additional search criteria field to add more criteria regarding genes to narrow the search results. Only records containing or referencing the specified gene criteria will be returned. Selecting items in this list will make the following new fields appear:
 1. **Gene:** Selection list to select a specific gene name.
 2. **Introduced or modified traits:** Selection list to narrow the search results to records which match the selected options.
4. **Type of organism:** Additional search criteria field to add more criteria regarding organisms to narrow the search results. Only records containing or referencing the specified organism criteria will be returned. Selecting items in this list will make the following new fields appear:
 1. **Parental organism (common name):** Selection list for specifying an organism by its common name.

2. **Parental organism (scientific name):** Selection list for specifying an organism by its scientific name.
5. **Date of record:** Date field for narrowing the search results to a time interval.
6. **Keyword search:** Keyword field for narrowing the results by keyword.

See “Using the search pages” (Section 2.1) to learn about types of fields and their operation.

The screenshot shows a search interface for LMOs, Genes, or Organisms. At the top, there are links for Home, Finding Information, and a search bar. Below the header, the title "Search for LMOs, Genes or Organisms" is displayed. A descriptive text explains that users can search three registries: LMO-Unique Identifiers Registry, Gene Registry, and Organism Registry. A note says to choose fields as needed to narrow search results; if no category is selected, a default value of "all" will be used. The search form includes dropdown menus for Registries, Type of living modified organism, Type of gene, Type of organism, Date of record, and a Keyword search field. A "Search" button is located at the top right of the form area. The Keyword search field has a placeholder "Enter keywords. Separate words with AND or OR." Below the form are two buttons: "Browse all records" and "Search". Six yellow arrows numbered 1 through 6 point to specific elements: 1 points to the first dropdown menu for Registries; 2 points to the second dropdown menu for Type of living modified organism; 3 points to the third dropdown menu for Type of gene; 4 points to the fourth dropdown menu for Type of organism; 5 points to the fifth dropdown menu for Date of record; and 6 points to the Keyword search input field.

Figure 33

2.5.1 LMO - Unique Identifiers Registry

The **LMO - Unique Identifiers Registry** contains all LMO records, which includes information about the transformation event, genetic modification, and the unique identification code (if available). The records provide links to all decisions and risk assessment reports that refer to these organisms.

Search for LMOs, Genes or Organisms

On this page you can search: (i) The **LMO-Unique Identifiers Registry (LMO-UIDs)**, which provides summary information on all living modified organisms registered in the BCH including transformation events, genetic modifications, and the unique identification code (if available) for each record. Links to all decisions that refer to these organisms are provided at the bottom of each LMO record accessible through the registry; (ii) The **Gene Registry**, which provides summary information on gene inserts and characteristics of the genetic modifications of LMOs; and (iii) The **Organism Registry**, which provides summary information on parental, recipient or donor organisms related to the LMOs registered in the BCH.

Choose fields as needed to narrow search results. If no category is selected to narrow the search for a particular field, a default value of "all" will be used.

Registries	<input type="button" value="<All>"/> <input type="button" value="LMO-Unique Identifiers Registry (LMO-UIDs)"/> <input type="button" value="Gene Registry"/> <input type="button" value="Organism Registry"/>
Type of living modified organism	<input type="button" value="<All>"/> <input type="button" value="LMO-Unique Identifiers Registry (LMO-UIDs)"/> <input type="button" value="Gene Registry"/> <input type="button" value="Organism Registry"/>
Type of gene	<input type="button" value="<All>"/> <input type="button" value="Gene Registry"/> <input type="button" value="Organism Registry"/>

Figure 34

To narrow search results to records in the LMO - Unique Identifiers Registry, select that option from the **Registries** field. **Records** in the LMOs registry provide the following information:

1. Contact information of the developer, company or applicant;
2. Name and identity of the LMO (trade name);
3. Unique identification (when available);
4. Information about related LMOs;
5. Information on the recipient or parental organism (including Taxonomic name or status, Common name(s) and Point of collection or acquisition);
6. Information about the LMO (including the Transformation event, Techniques used for modification, Gene inserts, Donor organism(s) Point of collection or acquisition of donor organism(s), Introduced or modified traits and description of gene modification);
7. Any other relevant information and references.

Once a record is selected from the registry (either from the search results or from the compiled information registry), its information is displayed on the screen. Three tabs at the top of each LMO record provide links to:

1. LMO information;
2. Decisions on the LMO; and
3. Risk assessments.

Using Modified Organism Identity

LMO name: NewLeaf™ Atlantic Potato
Transformation event: ATET54-31
Unique identifier: NMK-89170-9
Developer(s):

Figure 35

The **LMO Information** tab displays general information about the LMO, including its name, transformation event, unique identifier, and more data.

The **Decisions on the LMO** tab displays all decisions taken by countries regarding this LMO in a table format. The first column of the table displays the country taking the decision, while the rest of the columns indicate which categories of use of the LMO have been addressed in the decision. If a decision from a country addresses a particular use of the LMO, then a green icon will appear in the column corresponding to that category of use; clicking on that icon will take the user to the record of the decision and display the information about it. If, for example, a country has taken a decision about using the LMO for food, feed and processing, then there will be a green icon under each of those three categories in the row corresponding to that country in the table.

Canada								
United States of America								

Figure 36

The **Risk Assessments** tab provides a list of all records containing information about risk assessments regarding the LMO selected.

Unique Identification

The BCH Central Portal uses a unique identification system for living modified organisms to facilitate searching and retrieval of information. Currently, the only existing unique identification system in international use is the OECD Unique Identifier for Transgenic Plants.

The OECD **Unique Identifier** is a simple alphanumeric code that is given to each living modified plant that is approved for commercial use, including for use as food or feed, similar to the ISBN codes used to identify books. The OECD naming system has been designed so that developers of a new transgenic plant can generate an identifier and include it in the dossiers that they forward to national authorities during the safety assessment process. Once approved, national authorities forward the unique identifier to the OECD Secretariat for inclusion in the OECD's product database, from which the information is automatically shared with the Biosafety Clearing-House.

The unique identifier is a nine-digit code, composed of three elements that are separated by dashes (-). These elements are:

1. 2 or 3 alphanumeric digits to designate the applicant;
2. 5 or 6 alphanumeric digits to designate the transformation event;
3. 1 numerical digit for verification (this is intended to reduce errors by ensuring the integrity of the alphanumeric code).

		< Previous 1 2 Next >
ID	Record holder and type	Source
14759	Unique Identification Registry ACS-BN005-8 - InVigor™ Canola Bayer CropScience (Aventis (AgrEvo (Plant Genetic Systems))) Brassica napus - Canola (Argentine) Male sterility, Glufosinate tolerance, Kanamycin resistance	OECD
14839	Unique Identification Registry FLO-00066-8 - Long vase life carnation Florigene Dianthus caryophyllus - Carnations Reduced ethylene synthesis, Sulfonyleurea tolerance	OECD Cont. 1

Figure 37

Two approaches are possible for products created with more than one transformation event (often referred to as “stacked” transformation events), where these transformation events have been previously approved for commercialization. An applicant may choose to generate a novel unique identifier for such products or they may choose to use a combination of the unique identifiers from products previously approved for commercialization.

2.5.2 Gene Registry

The **Gene Registry** contains information about gene inserts and characteristics of the modification of LMOs. Records in this registry provide the following information:

1. Name of the gene;
2. Introduced or modified traits;
3. Gene product;
4. Gene function;

5. Information about the donor organism (including reference to the point of collection or acquisition of recipient organism or parental organisms);
6. Additional information.

Conventionally, gene names are written in italics and the proteins typically use the same name as the originating gene but in regular font. For example, the *cry1A(b)* gene produces the Cry1A(b) protein.

Search for LMOs, Genes or Organisms

On this page you can search: (i) The **LMO-Unique Identifiers Registry (LMO-UUIDs)**, which provides summary information on all living modified organisms registered in the BCH including transformation events, genetic modifications, and the unique identification code (if available) for each record. Links to all decisions that refer to these organisms are provided at the bottom of each LMO record accessible through the registry; (ii) The **Gene Registry**, which provides summary information on gene inserts and characteristics of the genetic modifications of LMOs; and (iii) The **Organism Registry**, which provides summary information on parental, recipient or donor organisms related to the LMOs registered in the BCH.

Choose fields as needed to narrow search results. If no category is selected to narrow the search for a particular field, a default value of "all" will be used.

Registries	<input type="text" value="<All>"/>	<input type="button" value="Search"/>
Type of living modified organism	<input type="text" value="<All>"/>	<input type="button" value=""/>
Type of gene	<input type="text" value="<All>"/>	<input type="button" value=""/>

The 'Registries' dropdown menu is open, showing three options: 'LMO Unique Identifiers Registry (LMO-UUIDs)', 'Gene Registry' (which is highlighted with a red oval), and 'Organism Registry'. The 'Type of living modified organism' and 'Type of gene' dropdown menus both show '<All>'.

Figure 38

To narrow search results to records in the Gene Registry, select that option from the **Registries** field.

2.5.3 Parent or Donor Organism Registry

The **Parent or Donor Organism Registry** provides summary information on parental, recipient or donor organisms related to the LMOs registered in the BCH Central Portal. Records in this registry provide the following information:

1. Taxonomic name or status;
2. Common name(s);
3. Characteristics related to biosafety;
4. Centre(s) of origin of the organism;
5. Centre(s) of genetic diversity, if known, of the organism;
6. Habitats where the organism may persist or proliferate;
7. Any other relevant information.

Search for LMOs, Genes or Organisms

On this page you can search: (i) The **LMO-Unique Identifiers Registry (LMO-UIds)**, which provides summary information on all living modified organisms registered in the BCH including transformation events, genetic modifications, and the unique identification code (if available) for each record. Links to all decisions that refer to these organisms are provided at the bottom of each LMO record accessible through the registry; (ii) The **Gene Registry**, which provides summary information on gene inserts and characteristics of the genetic modifications of LMOs; and (iii) The **Organism Registry**, which provides summary information on parental, recipient or donor organisms related to the LMOs registered in the BCH.

Choose fields as needed to narrow search results. If no category is selected to narrow the search for a particular field, a default value of "all" will be used.

Registries	<input type="button" value="Search"/>
Type of living modified organism	<input type="button" value="Organism Registry"/>
Type of gene	<input type="button" value="Gene Registry"/>

Figure 39

To narrow search results to records in the Organism Registry, select that option from the **Registries** field.

2.5.4 Example on searching the registries

Example: A user wishes to identify all the potato modifications that result in resistance to viruses. The user: (i) selects **Filter by gene trait** in the **Type of gene** box and then **Viruses** in the **Introduced or modified traits** box; and (ii) selects the **Filter by common name** in the **Type of organisms** box and then selects **Potato** in the **Parental organism (common name)** box.

Clicking on the **Search** button presents the search results, which are displayed as a list of records. Detailed information about each LMO can be viewed by clicking on the title of the record.

Figure 40

The screenshot shows the BCH Central Portal's search interface. At the top, there's a navigation bar with links for Home, Finding Information, and Search results. Below this is a search results table titled 'Search results' with 10 records. The first record is highlighted: '14892 Modified Organism NMK-89185-6 - Russet Burbank NewLeaf Plus™ Potato'. To the right of the table, a detailed view of this specific record is shown in a modal window. The modal has tabs for LMO Information, Decisions on the LMO, and Risk Assessments. The LMO Information tab is active, displaying details like Record ID (14897), Status (Published), Date of creation (2006-06-05 19:40 GMT), Date of last update (2007-10-19 20:13 GMT), and Owner (kirsty.mcdean@bbsrc.ac.uk). The modal also contains sections for Living Modified Organism identity (LMO name: Russet Burbank NewLeaf Plus™ Potato), Transformation event (R8MT21-350), and Unique identifier (NMK-89185-6).

This picture was taken on February 2010 with the only purpose of providing an example on the usage of the BCH.

Figure 41

2.6 Roster of Experts

URL: <http://bch.cbd.int/database/experts/>

The Roster of Experts was established by the Conference of the Parties to the Convention on Biological Diversity (COP) when the Protocol was adopted (see Decision EM-I/3 and Decision BS-IV/4). Its purpose is "to provide advice and other support, as appropriate and upon request, to developing country Parties, in particular the least developed and small island developing States among them, and Parties with economies in transition, to conduct risk assessment, make informed decisions, develop national human resources and promote institutional strengthening, associated with the transboundary movement of LMOs".

The COP-MOP, the governing body of the Protocol, decided that access to the roster of experts will be maintained through the BCH, where nomination forms for the roster are available, so that Parties can nominate experts. Reports on the Roster of Experts database and the voluntary fund are accessible under the reporting section of The Protocol pages. Module 03 covers access to these reports.

The search page for the **Roster of Experts** database can be accessed from the **Finding Information** drop down menu on the navigation bar, or from the link in the left-hand menu of the **Finding Information** page or the **Roster of Experts** link in the text of that page. These links take users to the **Search the Roster of Experts** page where they can search for biosafety experts nominated by Governments.

The screenshot shows the main navigation bar at the top with links for Home, The BCH, The Protocol, Finding Information, Registering Information, Resources, Help, and Country Profiles... A 'Sign Up for an Account' and 'Sign In' button are also present. Below the navigation is a banner for the Convention on Biological Diversity featuring a globe and a hand holding a plant. The main content area has a green header 'Finding Information'. On the left, a sidebar lists various categories: National Contacts, Laws and Regulations, Country's Decisions and other Communications, LMOs, Genes or Organisms, **Roster of Experts** (circled in red), Capacity-Building, Biosafety Information Resource Centre (BIRC), Scientific Bibliographic Database, Organizations, Compiled Information, National Contacts, LMO Registry, Organism Registry, Gene Registry, and Go to record ID with a Go button. The main content area under 'Finding Information' includes sections for National Records (National Contacts, Laws and Regulations, Country's Decisions and other Communications, Roster of Experts - circled in red), Reference Records (LMOs, Genes or Organisms, Capacity-Building, Directory of International Organizations involved in Biosafety Activities, Biosafety Information Resource Centre), and a 'Welcome' message for the Finding Information section.

Figure 42

Choose fields as needed to narrow search results. If no category is selected to narrow the search for a particular field, a default value of "all" will be used.

Figure 43

On the **Search the Roster of Experts** page there are several search criteria boxes:

1. **Country:** Selection list field for selecting a country
2. **Region:** Selection list field for selecting a region
3. **Experts:** Additional search criteria field to add more criteria regarding the experts to narrow the search results. By selecting items in this list, the user can make the following new fields appear:
 1. **Expert name:** keyword field to search by expert name
 2. **Nationality:** Selection list to narrow search results to experts of the specified nationality
 3. **Nominating country:** Selection list to narrow search results to experts nominated by the specified country.
4. **Main area of expertise:** Selection list to narrow search results to experts with the specified main area of expertise.
5. **Date of record:** Date field for narrowing the search results to a time interval
6. **Keyword search:** Keyword field for narrowing the results by keyword

See “Using the search pages” (Section 2.1) to learn about types of fields and their operation.

Example: A user wishes to identify experts from Europe who have experience in forestry and risk assessment. The user (i) selects Eurasia – Europe (all countries) in the **Region** box and (ii) enters forestry AND risk assessment in the **Keywords** box.

Clicking on the **Search** button presents the search results. The search results are displayed as a list of records, sorted by country. Detailed information about each expert can be viewed by selecting the expert’s name, which opens the record.

Choose fields as needed to narrow search results. If no category is selected to narrow the search for a particular field, a default value of "all" will be used.

General information

Nominating Government

- Austria

Profile of the Expert

Helmut Gaugitsch studied technical chemistry at the Technical University of Vienna, with graduation as PhD in biotechnology and food chemistry. He joined the Federal Environment Agency Austria in 1991 and worked on ecological risk assessment, monitoring and coexistence of genetically modified organisms (GMO) since. Presently he serves as Head of Unit Landuse & Biosafety at the Federal Environment Agency. Main areas of work: Reviewing of European GMO notifications concerning the risk assessment and monitoring of GMOs, coordination and preparation of studies on environmental effects of GMOs, assistance development and implementation of national, regional and international Regulatory Frameworks for biosafety, National Focal Point for the Cartagena Protocol, environmental effects of landuse, agriculture and forestry.

This picture was taken on February 2010 with the only purpose of providing an example on the usage of the BCH.

Figure 45

2.7 Capacity-Building

URL: <http://bch.cbd.int/database/activities/>

Under Article 22 of the Protocol, Parties are required to cooperate in the developing and/or strengthening of human resources and institutional capacity for the effective implementation of the Protocol. Through the

Finding information in the BCH Central Portal

BCH, Parties and others can access information about capacity-building and other assistance for implementation of the Protocol. In addition, governments can register their capacity-building needs and priorities in the BCH.

The search page for information about capacity building can be accessed from the link on the **Finding Information** drop down menu on the navigation bar, or from the link in the left-hand menu of the **Finding Information** page, or from the **Capacity Building** link in the text of that page.

The screenshot shows the BCH website's 'Finding Information' section. The left sidebar has a 'Capacity-Building' link, which is highlighted with a red circle. The main content area has two sections: 'National Records' and 'Reference Records'. Each section contains several links to specific databases and registries, such as 'National Contacts', 'Laws and Regulations', 'Country's Decisions and other Communications', 'Roster of Experts', 'Biosafety Information Resource Centre (BIRC)', 'Scientific Bibliographic Database', 'Organizations', 'Compiled Information', and 'Go to record ID' with a 'Go' button. The top navigation bar includes links for Home, The BCH, The Protocol, Finding Information, Registering Information, Resources, Help, and Country Profiles... . The top right corner has 'Sign Up for an Account' and 'Sign In' buttons.

Figure 46

On the **Search for information on Capacity-Building** page the user can search for:

1. Biosafety Capacity Building Projects;
2. Capacity-Building Opportunities;
3. Capacity-Building Needs and Priorities;
4. Academically - Accredited Biosafety Courses;
5. Outcomes and Lessons Learned

On the **Search for information on Capacity-Building** page there are several search criteria boxes:

1. **Type of assistance:** Selection list to narrow search results to countries proving or requiring assistance.

2. **Country:** Selection list field for selecting a country.
3. **Region:** Selection list field for selecting a region.
4. **Capacity building categories:** Selection list to narrow search results to records regarding specific categories of capacity building.
5. **Project, Opportunities, Needs and Priorities:** Additional search criteria field to add more criteria to narrow the search results. By selecting items in this list, the user can make the following new fields appear:
 1. **Name of the project:** keyword field for searching by project name
 2. **Capacity Building areas:** Selection list for narrowing the search results by capacity building area
 3. **Status:** Selection list for narrowing the search results by project status
 4. **Type of implementing agency:** Selection list for narrowing the search results to records which match the specified types of implementing agency
 5. **Lead organization:** Keyword field for searching by organization
 6. **Source of funding:** Selection list for narrowing search results to specific sources of funding
6. **Training offered:** Additional search criteria field to add more criteria to narrow the search results. By selecting items in this list, the user can make the following new fields appear:
 1. **Thematic area:** Selection list for narrowing the search results to the specified thematic areas in the training offered
 2. **Type of accreditation:** Selection list for narrowing the search results to the specified type of accreditation offered
7. **Date of record:** Date field for narrowing the search results to a time interval
8. **Keyword search:** Keyword field for narrowing the results by keyword

See “Using the search pages” (Section 2.1) to learn about types of fields and their operation.

In addition to the features described in “Managing Search Results” (Section 2.1.2), the **Search results** page for Capacity-building provides a feature for sorting records. By selecting an option in the **Sort records by** box, records in the result list will be sorted accordingly. Also, at the end of the page there is an **Export all results to XML** link. This allows the user to download the search results in XML (Extensible Markup Language) format, a standard format useful for sharing data across different systems.

2.8 Biosafety Information Resource Centre (BIRC)

URL: <http://bch.cbd.int/database/resources/>

Article 20 of the Protocol establishes the BCH to facilitate the exchange of information and experience with LMOs among Parties in order to assist them in implementing the Protocol. To help fulfill this role, the BCH contains information submitted by Parties, governments and organizations that is relevant to biosafety and implementation of the Protocol.

The **Biosafety Information Resource Centre** (BIRC) contains electronic catalogues of biosafety-related publications and information resources for policymakers, educators, researchers, and the general public. BIRC records may be registered by all BCH account-holders.

The search page for the BIRC can be accessed from the **Finding Information** drop down menu on the navigation bar, or from the link in the left-hand menu of the **Finding Information** page, or from **Biosafety Information Resource Centre** link in the text of that page.

Biosafety Clearing-House | Convention on Biological Diversity

Finding Information

[Home](#) | [Finding Information](#)

Finding Information

Welcome to the **Finding Information** section of the BCH. Here a wide variety of scientific, technical, environmental, legal and capacity building information can be accessed. The information currently available is organized into two categories: a) **National Records** submitted by Governments as mandated by Article 20 of the Protocol and b) **Reference Records** which are submitted by general BCH users. Included under the Reference records category are three registries regarding LMO information appearing in other BCH records.

National Records

[Biosafety Information Resource Centre](#)

Figure 50

These links enable users to access electronic catalogues of biosafety-related publications and information resources as follows:

1. News services (including email listservs);
2. Online databases and search engines;

3. Reports and case studies;
4. Journals;
5. Newsletters;
6. Teaching materials (including manuals, toolkits and presentations).

On the [Search the Biosafety Information Resource Centre \(BIRC\)](#) page there are several search criteria boxes:

1. **Publication year:** Selection lists to narrow search results by year of publication. The first selection list specifies whether resources published earlier or later than the date specified in the second box are to be considered. If any of the two selection lists is left empty, then this field will not narrow the search results.
2. **Thematic area:** Selection list to narrow the search results to resources regarding the specified subjects.
3. **Type of record:** Selection list to specify the types of resources to be included in the search results.
4. **Language:** Selection list to narrow the search results to resources in the specified languages.
5. **Date of record:** Date field for narrowing the search results to a time interval
6. **Keyword search:** Keyword field for narrowing the results by keyword

See “Using the search pages” (Section 2.1) to learn about types of fields and their operation.

Choose fields as needed to narrow search results. If no category is selected to narrow the search for a particular field, a default value of "all" will be used.

Figure 53

2.9 Scientific Bibliographic Database

URL: <http://bch.cbd.int/database/bibliographic-references/>

Article 20 of the Protocol establishes the BCH in order to facilitate the exchange of information and experience with LMOs among parties, so as to assist them in implementing the Protocol. To help fulfill this

role the BCH Central Portal contains information submitted by Parties, governments and organizations that is relevant to biosafety and implementation of the Protocol.

In addition to the **Biosafety Information Resource Centre (BIRC)** (Section 2.8), the BCH provides access to a bibliographic collection of scientific articles (full reference + abstract), published in national and international scientific periodicals from 1990 onwards, that are relevant to biosafety and risk assessment of biotechnology. The **Scientific Bibliographic Database** is hosted and managed by the International Centre for Genetic Engineering and Biotechnology (ICGEB) and has been made interoperable with the BCH.

The BCH search page for publications in the **Scientific Bibliographic Database** can be accessed using the link in the **Finding Information** drop down menu on the navigation bar, or the link in the left-hand menu of the **Finding Information** page or **Scientific Bibliographic Database** link in the text of that page.

The screenshot shows the BCH website's 'Finding Information' section. The left sidebar has a vertical list of links, one of which, 'Scientific Bibliographic Database', is highlighted with a red oval. The main content area has two columns. The left column is titled 'National Records' and includes links for 'National Contacts', 'Laws and Regulations', 'Country's Decisions and other Communications', 'LMOs, Genes or Organisms', 'Roster of Experts', 'Capacity-Building', 'Biosafety Information Resource Centre (BIRC)', 'Organizations', and 'Compiled Information'. The right column is titled 'Reference Records' and includes links for 'LMOs, Genes or Organisms', 'Capacity-Building', 'Directory of International Organizations involved in Biosafety Activities', and 'Biosafety Information Resource Centre'. At the top of the page, there are language links (Arabic, Chinese, English, Spanish, French, Russian) and account links (Sign Up for an Account, Sign In). The top navigation bar includes links for Home, The BCH, The Protocol, Finding Information, Registering Information, Resources, Help, and Country Profiles... .

Figure 54

On the **Search the Scientific Bibliographic Database on Biosafety** page there are several search criteria boxes:

1. **Title:** Keyword field to search by publication title.
2. **Authors(s):** Keyword field to search by authors
3. **Publication year:** Selection lists to narrow search results by year of publication. The first selection list specifies whether resources published earlier or later than the date specified in the second box are to be considered. If any of the two selection lists is left empty, then this field will not narrow the search results.
4. **Date of record:** Date field for narrowing the search results to a time interval

5. Keyword search: Keyword field for narrowing the results by keyword

See “Using the search pages” (Section 2.1) to learn about types of fields and their operation.

Choose fields as needed to narrow search results. If no category is selected to narrow the search for a particular field, a default value of "all" will be used.

Search »

Title	1	<input type="text"/>

<input type="button" value="Browse all records »"/> <input type="button" value="Search »"/>		

Figure 56

The screenshot shows a search results page with a yellow arrow highlighting the 'Source' link in the header. Below the header, there is a list of records with titles and abstracts. A specific record is expanded, showing detailed information in a modal window.

Record information and status:

- Record ID: 40941
- Status: Published
- Date of creation: 2007-01-29 00:45:00 (ICGEB-NODE)
- Date of last update: 2008-01-25 21:03:00 (ICGEB-NODE)
- Owner: ICGEB-NODE

General information:

- Title:** A flexible modelling framework linking the spatio-temporal dynamics of plant genotypes and populations: application to gene flow from transgenic forests.
- Author / Creator:** Kuparinen, A.; Schurr, F. H.
- Date:** 2007
- Rights:** Department of Mathematics and Statistics, University of Helsinki, P.O. Box 68, 00014 University of Helsinki, Finland.
- Source:** Ecological Modelling vol. 202 (3/4) p.476-486

Cont. ↓

This picture was taken on February 2010 with the only purpose of providing an example on the usage of the BCH.

Figure 57

Assuming that the user finds a useful article by a certain author, the search can be refined by adding the author's name to the **Author(s)** search box. This will narrow the search results to recent articles by the same author regarding this subject.

2.10 Organizations

URL: <http://bch.cbd.int/database/organizations/>

The worldwide and multidisciplinary nature of the Protocol provides a wide stakeholder base for its implementation, extending beyond its Parties. Accordingly, the BCH maintains a database of organizations that are involved in biosafety-related issues.

The search page for information about **Organizations** can be accessed from the **Finding Information** drop down menu on the navigation bar, or from the link in the left-hand menu of the **Finding Information** page or from the **Directory of International Organizations involved in Biosafety Activities** link in the text of that page.

Figure 58

This search page allows users to access information about organizations involved in biosafety and includes summaries of the activities of these organizations and their contact information.

On the **Search for Organizations involved in Biosafety Activities** page are several search criteria boxes:

1. **Country:** Selection list field for selecting a country
2. **Region:** Selection list field for selecting a region
3. **Organization name:** Keyword field for searching by organization name
4. **Contact name:** Keyword field for searching by organization contact
5. **Type of organization:** Selection list to narrow search results to organization of the specified types
6. **Date of record:** Date field for narrowing the search results to a time interval
7. **Keyword search:** Keyword field for narrowing the results by keyword

See "Using the search pages" (Section 2.1) to learn about types of fields and their operation.

Finding information in the BCH Central Portal

The screenshot shows the BCH Central Portal interface. At the top, there is a navigation bar with links to Home, Finding Information, and Search results, along with various search and filter icons. Below this is a section titled "Search results" with the sub-instruction "Record 1 to 5 of 5". A yellow arrow points from the "Record 1 to 5 of 5" text down to the first item in the list. The list contains five entries, each with an ID, type, name, and a small thumbnail icon. The first entry is highlighted with a yellow background. To the right of the list is a detailed view of the first record, which includes sections for "Record information and status" (with fields for Record ID, Status, Date of creation, Date of last update, and Owner), "General information" (with a field for Name of the Organization containing "State Environmental Protection Administration (China)"), and "Coordinates" (with a field for Coordinates containing "State Environmental Protection Administration (China) China").

This picture was taken on February 2010 with the only purpose of providing an example on the usage of the BCH.

Figure 61

To change the search to projects linked to the private sector, the user selects Private sector (business and industry) in the type of organization box.

Choose fields as needed to narrow search results. If no category is selected to narrow the search for a particular field, a default value of "all" will be used.

3 Compiled Information

URL: <http://bch.cbd.int/database/>

The *Compiled Lists* of information are maintained and regularly updated by the BCH for the following categories of data: National Contacts, LMOs, Organisms and Genes. Unlike information accessible through the search pages, compiled information is provided in a list format, and is easily accessible either on the screen or in a PDF file.

Access to the compiled lists of information is provided from the link in the **Finding Information** drop down menu on the navigation bar or from the link in the left-hand menu of the **Finding Information** page.

The screenshot shows the 'Biosafety Clearing-House' website. At the top, there are language links (arabic, 中文, english, español, français, русский) and account options (Sign Up for an Account, Sign In). The main header features the 'Convention on Biological Diversity' logo and a background image of a hand holding a globe. The navigation bar includes links for Home, The BCH, The Protocol, Finding Information, Registering Information, Resources, Help, and Country Profiles... A search bar is also present.

Left Sidebar (Finding Information):

- National Contacts
- Laws and Regulations
- Country's Decisions and other Communications
- LMOs, Genes or Organisms
- Roster of Experts
- Capacity-Building
- Biosafety Information Resource Centre (BIRC)
- Scientific Bibliographic Database
- Organizations

Figure 64

3.1 National Contacts Compiled List

URL: <http://bch.cbd.int/database/contacts/focalpoints.shtml>

Access to the compiled lists of national contacts can be obtained using the **National Contacts** link in the left-hand menu of the **Finding Information** page or in the **Finding Information** drop down menu on the navigation bar of the BCH Central Portal.

These links take users to the **National Contacts & Competent Authorities** page, which provides links to compiled lists of:

1. Cartagena Protocol National Focal Points;
2. Biosafety Clearing-House National Focal Points;

Finding information in the BCH Central Portal

3. Emergency Measures Contact Points (Article 17); and
4. Competent National Authorities.

These compiled lists are updated weekly.

The screenshot shows the 'National Contacts & Competent Authorities' page. On the left, there's a sidebar with a red circle around the 'National Contacts' link. A yellow arrow points from this link to the 'Cartagena Protocol National Focal Points' section on the right. The main content area has a grey header 'Cartagena Protocol National Focal Points' and a sub-section 'Cartagena Protocol on Biosafety, Biosafety Clearing-House and Article 17 National Focal Points'. It includes contact information for the Biosafety Clearing-House and links to download PDFs of national focal points for both the Cartagena Protocol and the BCH.

This picture was taken on February 2010 with the only purpose of providing an example on the usage of the BCH.

Figure 65

3.2 LMO Registry Compiled List

URL: <http://bch.cbd.int/database/organisms/uniqueidentifiers/default.shtml>

Access to the compiled list of LMOs can be obtained using the **LMO Registry** link in the left hand menu of the **Finding Information** page or in the **Finding Information** drop down menu on the navigation bar of the BCH Central Portal.

The **Living Modified Organism (LMO) Registry** page provides a list of all LMOs registered in the BCH database. Clicking on a record ID number will display the record data. It is also possible to search for specific LMOs in the LMO registry by using the **Search for LMOs, Genes or Organisms** page.

3.3 Organism Registry Compiled List

URL: <http://bch.cbd.int/database/organisms/organismslist.shtml>

Access to the compiled list of organisms can be obtained using the **Organism Registry** link in the left hand menu of the **Finding Information** page or in the **Finding Information** drop down menu on the navigation bar of the BCH Central Portal.

The **Organism Registry** page provides a list of all organisms registered in the BCH database. Clicking on a record ID number will display the record data. It is also possible to search for specific organisms in the

organism registry by using the [Search for LMOs, Genes or Organisms](#) page.

3.4 Gene Registry Compiled List

URL: <http://bch.cbd.int/database/organisms/genes/default.shtml>

Access to the compiled list of genes can be obtained using the **Gene Registry** link in the left hand menu of the [Finding Information](#) page or in the **Finding Information** drop down menu on the navigation bar of the BCH Central Portal.

The [Gene and DNA Sequence Registry](#) page provides a list of all genes and DNA sequences registered in the BCH database. Clicking on a record ID number will display the record data. It is also possible to search for specific genes and DNA sequences in the gene registry by using the [Search for LMOs, Genes or Organisms](#) page.

4 Search using Record ID

URL: <http://bch.cbd.int/database/>

The BCH Central Portal provides a quick search facility which allows users to search for specific records by the official ID number under which the record has been registered in the BCH. The **Go to record ID** search box is located on pages of the **Finding Information** section at the bottom of the left-hand menu.

Users who wish to access a specific record can enter the record number there and press **Go** to be taken directly to the record.

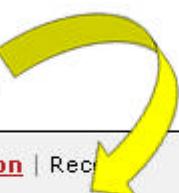

Figure 66

Example: A user looking for Record ID 300 enters 300 in the **Go to record ID** search box and then press **Go**.
